

KYRYLO KUDREVYCH

Bioinformatics student at Poznan University of Technology with hands-on projects in machine learning and data application development. Experience building and deploying end-to-end Python applications, including a deployed ML price-prediction service and a local RAG system. Seeking a data, machine learning, or software engineering internship for 2026/2027.

PROJECTS

Poznań Rent Radar – Rent Price Prediction Service | Python, FastAPI, Streamlit, Scikit-Learn

- Built a full pipeline: web scraper for live rental listings, feature engineering (one-hot encoding, log transforms), and a CatBoost model reaching validation MAE of around 307 PLN.
- Deployed as a FastAPI microservice with a Streamlit frontend and automated CI/CD on Railway.
- Benchmarked multiple gradient boosting models on log-transformed prices and selected CatBoost for its superior performance. Chose CatBoost over linear models to capture non-linear feature interactions.

GitHub: github.com/Olat1337/poznan-rent-radar

Poker Tournament Judge – Local RAG Application | LangChain, Llama 3, ChromaDB, aiogram

- Implemented retrieval-augmented generation over the official TDA poker rulebook using HuggingFace embeddings and ChromaDB, with responses grounded in retrieved rule citations.
- Delivered as an async Telegram bot with per-chat memory.
- Selected local inference via Ollama over API-based models to keep the system fully offline and free of per-request costs.

EXPERIENCE

Poznan University of Technology

Member, Data Science Section | GHOST Student Scientific Circle

Oct 2025 – Mar 2026

- Built classification and regression models on shared datasets using Scikit-Learn and PyTorch as part of group workshops.
- Wrote data-cleaning and validation scripts in Python (Pandas, NumPy) and SQL for circle projects.

Member | KNBI Bioinformatics Student Association

Oct 2024 – Oct 2025

- Applied Scikit-Learn algorithms to biological datasets in student research projects.
- Visualized high-dimensional data distributions using Matplotlib and Seaborn.

EDUCATION & CERTIFICATIONS

Poznan University of Technology

Oct 2024 – Apr 2028 (expected)

B.Sc. in Bioinformatics

Certifications:

- Kaggle – Advanced SQL, Intermediate ML, Time Series (2026)
- NVIDIA DLI – Fundamentals of Deep Learning (2025)

SKILLS

Programming: Python, SQL

Data & ML: Scikit-Learn, PyTorch, Pandas, NumPy, Matplotlib, Seaborn

AI & LLM: LangChain, ChromaDB, Ollama, HuggingFace

Backend & DevOps: FastAPI, Streamlit, Docker, Git, Linux

LANGUAGES

English (C1), Polish (C1), Ukrainian (Native), Russian (C2)
