PROFESSIONAL SUMMARY

Results-driven **AI & Data Science Engineer** specializing in **ML pipelines**, **RAG architectures**, and **data engineering**. **NVIDIA DLI Certified** with a B.Sc. in Bioinformatics. Proven ability to build accurate predictive models and deploy scalable **Python** solutions.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **ML & AI:** Scikit-Learn, PyTorch, LangChain, Ollama, HuggingFace, ChromaDB
- **Data & Tools:** Pandas, NumPy, Matplotlib, Seaborn, FastAPI, Streamlit, Git, Linux, Docker, CI/CD

FEATURED PROJECTS

Poznań Rent Radar: Real Estate Valuation Engine | Python, FastAPI, Streamlit, Scikit-Learn

- Developed a **full-stack ML microservice** predicting fair market rent via **real-time web scraping**, deployed with independent **CI/CD on Railway**.
- Engineered a robust pipeline (JSON parsing, One-Hot Encoding, log transformations) and trained a **Random Forest Regressor** (Validation MAE: ~337 PLN).

Poker Tournament Judge AI: RAG-Powered Rule Enforcer | LangChain, Llama 3, ChromaDB, aiogram

- Built a **hallucination-free AI referee** using a **RAG pipeline** (HuggingFace embeddings, ChromaDB) to resolve complex game disputes from the TDA rulebook.
- Implemented an async Telegram bot with multi-tenant memory and **100% local, privacy-first** execution via **Ollama**.

Global Video Game Sales Predictor | Python, Scikit-Learn, Seaborn

- Created an analytics pipeline estimating global sales from categorical data, benchmarking **Linear Regression vs. Random Forest** models.
- Designed **data visualizations** (**log-scale scatter plots** with $\pm 2x$ error bands) to highlight decision tree limitations on massive industry outliers.

EXPERIENCE

ML & Data Science Researcher | GHOST (Group Of Horribly Optimistic STatisticians) | Oct 2025 – Mar 2026

- Maintained robust data pipelines and ensured structural data integrity from scratch utilizing **Python (Pandas, NumPy)** and **SQL**.
- Designed and implemented predictive algorithms and **Deep Learning** models leveraging **PyTorch** and **Scikit-Learn**.

ML & Data Science Member | KNBI (Bioinformatics Scientific Club) | Oct 2024 – Oct 2025

- Applied **Scikit-Learn** machine learning algorithms to complex biological datasets to uncover patterns and extract actionable insights.
- Engineered data visualizations to map high-dimensional distributions and present findings clearly using **Matplotlib** and **Seaborn**.

EDUCATION & CERTIFICATIONS

B.Sc. in Bioinformatics | Poznan University of Technology | Oct 2024 – Present

- **Certifications:** **NVIDIA DLI** (Deep Learning), **Kaggle Data Science & Machine Learning Specialization** (Advanced SQL, Intermediate ML, Time Series).
